

WCP2500

Aluminized fiberglass cloth, the fabric is heat cleaned to set the weave and reduce fraying when cut. This fabric is then laminated to aluminum foil to provide a vapor barrier. This style has been designed for continuous use at temperatures up to 300°F. It has been manufactured to comply with MIL-C-20079.

Typical Properties

Maximum Temperature	300° F
Thickness	.032"
Weight	450 G/m ²
Coating	Aluminum Foil
Size	60 Inches
